AVython is a list

# CHAPTER 1

---

avython.console package

---

## Submodules

### avython.console.main module

```
class avython.console.main.bcolors

    BOLD = '\x1b[1m'
    ENDC = '\x1b[0m'
    FAIL = '\x1b[91m'
    HEADER = '\x1b[95m'
    OKBLUE = '\x1b[94m'
    OKGREEN = '\x1b[92m'
    UNDERLINE = '\x1b[4m'
    WARNING = '\x1b[93m'

avython.console.main.check_continue(message)
avython.console.main.error_color(message)
avython.console.main.exit_with_error()
avython.console.main.raw(*args, **kwargs)
avython.console.main.show_error(message)
avython.console.main.show_warning(message)
avython.console.main.warning_color(message)
```

---

## Module contents

# CHAPTER 2

---

## avython.download package

---

### Submodules

#### avython.download.driver module

```
class avython.download.driver.AbstractDriver
    Bases: object

        command_to_get = None

        download(remote_dir, local_dir)

class avython.download.driver.BaseDriver
    Bases: avython.download.driver.AbstractDriver

        download(remote_dir, local_dir)
```

#### avython.download.main module

```
class avython.download.main.Download(*args, **kwargs)
    Bases: object

        check_directory_exist_and_create(folder)
        check_empty(variable_to_check, error_msg)

        get()
        get_host_tmp_file()
        get_host_tmp_path()
        get_remote_file()
        get_remote_path()
```

```
host_file  
host_path
```

## avython.download.s3 module

```
class avython.download.s3.Driver  
    Bases: avython.download.driver.BaseDriver  
  
    command_to_get = 'aws s3 cp --recursive {} {}'
```

## avython.download.wget module

```
class avython.download.WgetDriver  
    Bases: avython.download.driver.BaseDriver  
  
    command_to_get = 'wget -t 3 {} -O {}'
```

## Module contents

# CHAPTER 3

---

avython.gitautotag package

---

## Submodules

`avython.gitautotag.main` module

Module contents

# CHAPTER 4

---

## Indices and tables

---

- genindex
- modindex
- search

---

## Python Module Index

---

### a

avython.console, 4  
avython.console.main, 3  
avython.download, 6  
avython.download.driver, 5  
avython.download.main, 5  
avython.download.s3, 6  
avython.download.wget, 6  
avython.gitautotag, 7

---

## Index

---

### A

AbstractDriver (class in avy python.download.driver), 5  
avy python.console (module), 4  
avy python.console.main (module), 3  
avy python.download (module), 6  
avy python.download.driver (module), 5  
avy python.download.main (module), 5  
avy python.download.s3 (module), 6  
avy python.download.wget (module), 6  
avy python.gitautotag (module), 7

### B

BaseDriver (class in avy python.download.driver), 5  
bcolors (class in avy python.console.main), 3  
BOLD (avy python.console.main.bcolors attribute), 3

### C

check\_continue() (in module avy python.console.main), 3  
check\_directory\_exist\_and\_create()  
    (avy python.download.main.Download method), 5  
check\_empty()  
    (avy python.download.main.Download  
        method), 5  
command\_to\_get (avy python.download.driver.AbstractDriver  
    attribute), 5  
command\_to\_get (avy python.download.s3.Driver attribute),  
    6  
command\_to\_get (avy python.download.wget.Driver  
    attribute), 6

### D

Download (class in avy python.download.main), 5  
download()  
    (avy python.download.driver.AbstractDriver  
        method), 5  
download()  
    (avy python.download.driver.BaseDriver  
        method), 5  
Driver (class in avy python.download.s3), 6  
Driver (class in avy python.download.wget), 6

### E

ENDC (avy python.console.main.bcolors attribute), 3

error\_color() (in module avy python.console.main), 3  
exit\_with\_error() (in module avy python.console.main), 3

### F

FAIL (avy python.console.main.bcolors attribute), 3

### G

get() (avy python.download.main.Download method), 5  
get\_host\_tmp\_file()  
    (avy python.download.main.Download  
        method), 5  
get\_host\_tmp\_path()  
    (avy python.download.main.Download  
        method), 5  
get\_remote\_file()  
    (avy python.download.main.Download  
        method), 5  
get\_remote\_path()  
    (avy python.download.main.Download  
        method), 5

### H

HEADER (avy python.console.main.bcolors attribute), 3  
host\_file (avy python.download.main.Download attribute), 5  
host\_path (avy python.download.main.Download attribute),  
    6

### O

OKBLUE (avy python.console.main.bcolors attribute), 3  
OKGREEN (avy python.console.main.bcolors attribute), 3

### R

raw() (in module avy python.console.main), 3

### S

show\_error() (in module avy python.console.main), 3  
show\_warning() (in module avy python.console.main), 3

### U

UNDERLINE (avy python.console.main.bcolors attribute), 3

### W

WARNING (avy python.console.main.bcolors attribute), 3  
warning\_color() (in module avy python.console.main), 3
